Applicant(s)

KETLEY ET AL.

Examiner

Tam M. Nguyen

Art Unit

1764

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 September 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8, 10, 11 and 34 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8, 10, 11 and 34 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

The rejection of claims 1 and 2 under 35 USC § 102(b) anticipated by Brownawell et al. (EP-0252606) is withdrawn by the examiner in view of the amendment filed on September 13, 2006.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 1764

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-8, 10, 11 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over by Brownawell et al. (EP-0252606) in view of Galuszka (US 5,637,259).

Brownawell discloses a process for increasing the cetane number of a middle distillate fraction by contacting the fraction with oxygen in the presence of a catalyst comprising a metal of Group VIII (e.g., cobalt) and a support to produce an effluent stream having an oxygen content incorporated therein. Brownawell also teaches that the effluent stream comprises the claimed amount of oxygen content. (See abstract; page 5, lines 9-29; Tables, VII-X)

Brownawell does not disclose that the support comprises magnesium oxide or calcium oxides, does not specifically disclose the amount of Group VIII metal, and does not disclose the effluent stream TAN number is less than about 2 or 1 mg KOH/g.

Galuszka teaches an oxidation catalyst comprising a support comprising either magnesium oxide or calcium oxide. (See col. 3, lines 26-40)

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the process of Brownawell by using either magnesium oxide or calcium oxide as suggested by Galuszka because Brownawell teaches that any suitable support can be used in the process.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the process of Brownawell by using the claimed amount of cobalt because it is within the level of one of skill in the art to use any effective amount of cobalt

Art Unit: 1764

including the claimed amount with the expectation that any amount of cobalt would give similar results.

Since the modified process of Brownawell is similar to the claimed process in terms of feedstock and catalyst, it would be expected that the effluent stream from the modified process of Brownawell would have the TAN number as claimed.

Response to Arguments

The argument that Brownawell does not define or illustrate the term “suitable support material” and all the examples draw to a oil soluble metal salts is not persuasive because the invention of Brownawell does not limit to the examples and it is within the level of one of skill in the art to use any suitable support that is known in the art including the support from Galuszka.

The argument that Galuszka does not teach the use of a distillate stream and does not specifically teach that the catalyst comprises cobalt and a supporter selected from magnesia and calcium oxide is not persuasive. The examiner relied upon Galuszka to teach that the claimed supporter is known to use as a support for an oxidation catalyst. Both Galuszka and Brownawell teach that a metal of Group VIII including cobalt which can be incorporated into the catalyst.

The argument that Table II in the present specification shows the advantage of the invention catalyst compared to other catalysts is not persuasive because the evidence does not appear to be commensurate in scope with the claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tam M. Nguyen whose telephone number is (571) 272-1452. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
